Bathroom Lighting Buying Guide

When buying lighting for your bathroom, there are many safety precautions to think about, One of the most important factors is how close the lights will come to water. A drop of water on electrics can cause a dangerous safety hazard, which is why with taps, baths and showers it is essential to check the lighting's IP rating before buying. Different zones require different minimum ratings, so we have illustrated the different zones below:

Zone 1, 2 & 3 lights are rated for use in different areas of the bathroom. Zone 1 is for use inside a shower cubicle and around a bath, Zone 2 is for use on the wall up to a height of 225cm and Zone 3 is for use away from wet areas of the room.

We have an extensive collection of bathroom lighting to suit every purpose and décor. As a room of high function it is extremely important that your bathroom is well lit so that you can see clearly and be safe creating an opportunity to add design flair; with interesting designs you can create a very eye-catching lighting scheme.

Once you've considered the layout of your bathroom and the necessary safety precautions you can go ahead and browse through our bathroom lighting.

Bathroom lighting comes in all shapes and sizes lighting includes stylish illuminated mirrors. A lit bathroom mirror not only illuminates a key area of your bathroom but it is also a great space saving solution. Whether you're hoping to create a relaxing sanctuary, or a child-friendly wash area, your bathroom lighting is a key tool to make the space feel bigger and brighter.
